(formerly known as eDrishti)

MEET..... RAJESH KUMAR

Rajesh Kumar is an active member and student in National Blind School, New Delhi. He is currently pursuing Bachelor of Arts at a private university in Delhi.

PROBLEM STATEMENT

Scarce Educational Materials

Millions of visually impaired students face barriers in learning STEM due to traditional teaching methods reliant on visual tools, leaving them underserved.

Expensive Assistive Solutions

Existing solutions are either unavailable or prohibitively expensive, making them inaccessible to underserved communities, especially in developing nations like India.

Complexity of Braille STEM Concepts

Learning STEM subjects through braille poses significant challenges due to the intricacy of translating visual concepts like graphs, equations, and geometry into tactile formats.

OUR INNOVATIVE SOLUTIONS

01

Accessible Software Suite

An innovative software platform designed to translate complex STEM concepts into interactive and tactile formats, enabling visually impaired students to grasp subjects like math and geometry effectively.

02

Affordable Hardware Integration

A portable and cost-efficient hardware tool that supports braille-based learning, complemented by tactile diagrams and haptic feedback to make STEM education engaging and comprehensible.

03

AI-Driven Personalized Feedback

An AI-powered module providing real-time feedback and adaptive learning paths tailored to individual needs, addressing learning gaps and enhancing conceptual understanding for visually impaired learners.

OUR PRODUCT

SOFTWARE SERVICES

- Interactive Learning Modules
- Portable Tactile-Compatible Interface
- AI-Powered Feedback System
- Multilingual Support

01

Round-the-clock voice-enabled community group chats for students with visual impairments.

An interactive in-app classroom that enhances collaboration and tracks student progress, benefiting both students and teachers.

02

Customer Validation

“ It is easy to understand shapes and geometry using the device made by team E-DRISHTI than using braille for STEM and learning shapes.

~ Dhaninjay,
Visually Impaired person at NGO

”

“ E-DRISHTI is introducing new educational and cost-effective techniques to teach visually impaired people. It has a huge market scope.

~ Pranav Desai,
Founder of VOSAP,
UNICEF Subsidiary Non-Profit Organisation

”

“ E-DRISHTI is building a device for helping visually impaired people, thus, giving their life a new direction with lots of career opportunities.

~ K.N. Shashi,
President of Sal Netraheen Sewa Sanstha

”

Global Accessibility Awareness Day- 16th May

Story 3 (eDrishti):

Here comes the inspiring story of student developers Ishita Kapoor, Harsh Goyal and their team who developed 'eDrishti' application envisioning a more impactful learning process for students with visual disabilities. This initiative showcases how #AIForAccessibility, #AzureAI, and the vision of young minds are making incredible things happen! #Azure #GAAD #Accessibility #MicrosoftIndia #DiversityAndInclusion #AzureOpenAI

SIZE OF MARKET

Global assistive technology market (including education) projected at **\$25.4 billion by 2030**, growing at a **CAGR of 5.8%**

- Serviceable Obtainable Market: \$25–150 million
- Serviceable Addressable Market: \$500 million–\$1.5 billion
- Total Addressable Market: \$1.25–3 billion

COMPETITORS

	All in one system for educational resources	Providing STEM education to visually impaired	Cost-effective
ViiSar	✓	✓	✓
BlindPad	✗	✗	✗
Tactile Braille Pro by PCT	✗	✗	✗
BlisCare	✗	✗	✗

REVENUE MODEL

	Freemium Plan	Basic Plan	Premium Plan
Pricing	Free	Software: INR 180/ month Hardware: INR 6K (one-time)*	Software Suites, starting @ INR 300/ month Hardware: starting @ INR 20K
Features	• Limited features • Basic support • No customization	• Full access to standard features like adaptive learning modules and AI-driven feedback.	• Comprehensive analytics for teachers and institutions. • Customizable software integration for schools. • Real-time AI feedback for advanced STEM topics.

GROWTH PROJECTIONS

Subscriber Growth

- Driven by Freemium model converting users to paid plans.
- Marketing campaigns focused on Tier 1 and Tier 2 cities.

Institutional Growth

- Scaling partnerships with private schools and NGOs.
- Expansion to government-backed institutions for rural outreach.

Hardware Revenue

- Launching in Year 2 with a target of selling 10,000 units in the first year post-launch, growing to 30,000 in Year 3.

Beta Testing to Launch Preparation

THANK YOU
